

UNIVERSALBEDLEGS

Who couldn't use a few extra inches in the bedroom?

You know what we're talking about. That's right....storage.

The average metal bedframe is just high enough to inflict shin pain and just low enough to prevent under-bed storage. That's why we developed these durable, high density polymer bedlegs, eliminating the need for one-height-fits-all frames. Our bedlegs come in 4 sizes so you can decide how high your bed should be and how much storage space you need. You can even graduate the height as kids grow from toddlers to teens. Sized between 3 and 10 inches, our amazing invention can be adjusted to accommodate *your* every need in the bedroom.

Choose whatever size you desire: 3, 5, 7 — even 10 inches!

All Universal Bedleg products are made in the USA
